

Modifying and Installing VPM Policy with Director

1. Open Director:
<https://163.243.34.43:8082/>
2. Select: "**SSH Simple**"
3. Login with this username and password:
User Name: admin
Password: 64****
4. Select: "**Run/Continue**"
until Director appears
5. Select: the [**Configure**] tab
6. Under the Configuration Library section
from the Show drop down (top right)
Select: "**Overlays**"
7. Navigate: Custom Folders > Policy Overlays >
(A) GLOBAL DC HTTP PROXY
8. Select from Overlays on Left:
(A) GLOBAL DC HTTP VPM
9. Select: "**Edit...**"
10. Under Overlay Settings window (top right)
Highlight: "**VPM**"
11. Select: "**Edit**"
(modify where needed)
12. After modifying
Select: "**Save policy**"
13. Close: **View Generated CPL** window
14. Close: **Blue Coat Visual Policy Manager** window
15. Select: "**OK**"
16. Select: "**No**"
When prompted to "Fetch Refreshables"
(Do not select yes, if "yes" is selected, the VPM will be pulled from the device, and all changes just made to the policy will be lost)
17. Under Groups section (top left)
Select: Custom Groups >
(A) Goodyear GLOBAL
18. Select: "**Execute**"
19. Check selections: Confirmation Dialog window
If correct
Select: "**Yes**"

20. Execution Results will appear
Read: Confirm the execution was completed

Should not have any red errors.

21. Exit Blue Coat Director
Close: all windows

NOTE: If an overlay is not associated with a device, the overlay will not have the ability to execute on that device. Overlays may only be executed on associated devices.
